

Mr. Scott Morrison MP
Suite 102, Level 1
30 The Kingsway
Cronulla, NSW, 2230

2 May 2012

Dear Mr. Morrison,

**IN MY LETTER DATED 31 JANUARY 2012 I PRESENTED TO MINISTERS
EVANS & COMBET *PRIMA FACIE* EVIDENCE THAT CLAIMS OF
DANGEROUS GLOBAL WARMING ARE CONTRARY TO MODERN SCIENCE**

I write to you as my local Federal Member. Thank you for your assistance in obtaining an answer to my Question 3 and your ongoing assistance in trying to obtain answers to Questions numbered '1', '2', '4', '5' and '6' in my letter dated 31 January 2012.

Please forward this letter on my behalf to Senator the Hon Chris Evans, Minister for Tertiary Education, Skills, Science and Research and the Hon Greg Combet, Minister for Climate Change and Energy Efficiency and Minister for Industry and Innovation.

My concern is with federal government policy as it relates to man made emissions of CO₂ and the scientific basis for that policy. It is for this reason that I am writing to you and through you to the responsible Ministers, Senator the Hon Chris Evans and his colleague the Hon Greg Combet.

In my letter dated 31 January I presented to Ministers Evans and Combet *prima facie evidence* that around 80% of predicted global warming is attributable to a scientifically counter intuitive and unsubstantiated proposition; namely that the global hydrological cycle slows down as the climate warms.

In my letter I challenged the CSIRO to refute this *prima facie evidence* by asking them to answer five questions.

After several months of consideration the CSIRO has been unable to refute this *prima facie evidence*. It seems therefore that Minister Evans now has in his possession *irrefutable prima facie evidence* that around 80% of predicted global warming is attributable to a scientifically counter intuitive and unsubstantiated proposition.

Having regard to this *irrefutable prima facie evidence*, I respectfully suggest that Minister Evans has a responsibility to inform his colleague Minister Combet, Parliament and the Australian people, as a matter of urgency, that the very expensive and extremely disruptive government policies aimed at constraining man made emissions of CO2 should be suspended indefinitely.

Having regard to the passage of time since my letter of 31 January, it seems highly unlikely that the CSIRO will ever be able to refute this currently *irrefutable prima facie evidence*. However, should this highly unlikely event ever happen, then the suspension could of course be lifted.

I trust that both Minister Evans and Minister Combet will act urgently on this matter and inform Parliament on the earliest possible occasion.

Yours sincerely

Mr. L. B. Cummings MBA (UNSW), BE (UNSW)
